Classic Sudoku rules

Use this page as a quick paper reference before starting the puzzle section.

Core rules

1. Each row must contain the digits 1 to 9 exactly once.
2. Each column must contain the digits 1 to 9 exactly once.
3. Each 3x3 box must contain the digits 1 to 9 exactly once.
4. Given numbers are fixed. Do not change them while solving.

Solving routine

1. Start with the fullest row, column, or box.
2. Place only numbers that are forced by the grid.
3. Use small pencil notes when two or three candidates remain.
4. For fresh digital boards, visit todayssudoku.com.

Killer Sudoku rules

Killer Sudoku starts empty. Cage sums give the opening structure.

Cage rules

1. Each cage must add up to its printed total.
2. Digits cannot repeat inside the same cage.
3. Rows, columns, and 3x3 boxes still use normal Sudoku rules.
4. Small cages are usually the best starting point.

Useful arithmetic

1. The digits 1 to 9 add up to 45.
2. Every full row, column, or box also totals 45.
3. Use cage totals near a full area to infer missing sums.
4. A legal sum still has to fit the row, column, and box.
